## New Ownership. New Name. An Exciting New Future.

**M**ethodist Texsan Hospital is the newest member of the Methodist Healthcare family of outstanding health care facilities. Opening in 2004, the hospital primarily focused on the prevention, diagnosis and treatment of heart disease. In late 2010, the Methodist Healthcare System announced plans to purchase Texsan Heart Hospital. The purchase became final January 1, 2011. Over the prior seven-year period, physicians, nurses, medical technicians and professional staff developed an award-winning reputation for providing outstanding cardiovascular care in San Antonio and South Texas. Methodist Texsan Hospital is a 120-bed licensed acute care facility with all private rooms, four operating suites, four cardiac catheterization labs and a cardiovascular emergency department. Methodist Texsan Hospital is designated as an accredited Chest Pain Center.

## Fast Facts

- Methodist Texsan Hospital\* was originally conceived by a group of 70 physicians who wished to create a hospital to specifically focus on the care and prevention of heart disease. Heart disease remains the leading cause of death among Americans.
  - When you arrive at Methodist Texsan Hospital, you will be greeted by our friendly concierge staff. The concierge staff is a resource for patients as well as their families. The concierge staff is dedicated to offering you directions within the hospital, providing information about the hospital and offering information about nearby restaurants and hotels. Most importantly, the concierge provides updates to your family and loved ones during surgery.
  - During a cardiac emergency, each minute without treatment could cause more damage to your heart and decrease your chances for survival. To make every second count, the emergency department at Methodist Texsan Hospital is specially designed, equipped and staffed 24/7 for heart and vascular emergencies as well as many other emergency situations.
- The emergency center features:
- > Expertise in treating cardiovascular emergencies.
  - > Open 24 hours, 7 days a week.
  - > Physicians and Registered Nurses are trained in Advanced Cardiac Life Support (ACLS).
  - > Advanced treatment protocols recognizing differences in heart-related symptoms between female and male patients.
- The comfort of the patients and their families, along with advanced diagnosis, treatment and therapy, is the most important objective of Methodist Texsan Hospital. Patients in need of cardiovascular services have access to advanced technology and surgical techniques in a hospital specially designed for their treatment and recovery. From admission until discharge, patient care focuses on personal needs, comfort and convenience.

- Methodist Texsan Hospital has four catheterization labs located on the first floor of the hospital, adjacent to the emergency center and operating rooms. The cath labs feature advanced digital radiological equipment, providing outstanding digital image quality, lowering radiation exposure to both the patient and staff.
- Methodist Texsan Hospital has four operating suites located on the first floor, easily accessible from the emergency and day patient areas. These rooms accommodate specialized equipment for cardiac, thoracic and peripheral vascular surgical procedures. These suites are also significantly larger than typical operating rooms.
- Obesity significantly increases a person's risk of heart disease. That's why Methodist Texsan Hospital offers weight loss surgery. During surgery, you and your surgeon will benefit from our operating rooms supported by advanced clinical technologies. Highly skilled surgical nurses and techs are especially sensitive to the issues surrounding obesity. After surgery, you will be moved to one of our private rooms. Each private patient room is equipped with a sleeper chair, as we encourage one overnight visitor. While in your room, take advantage of the cable television, which also offers educational videos. A registered dietitian will advise you and your family about the nutritional changes you will need to make following surgery. Upon discharge, you can participate in a support group to assist in your weight loss journey.
- Learn more about the services at Methodist Texsan Hospital by visiting [www.MethodistTexsanHospital.com](http://www.MethodistTexsanHospital.com).
- Call DoctorSource at **210-575-0355** or **1-800-333-7333** for a free physician referral if you need to find a doctor specializing in cardiovascular disease, bariatric surgery or any other speciality.
